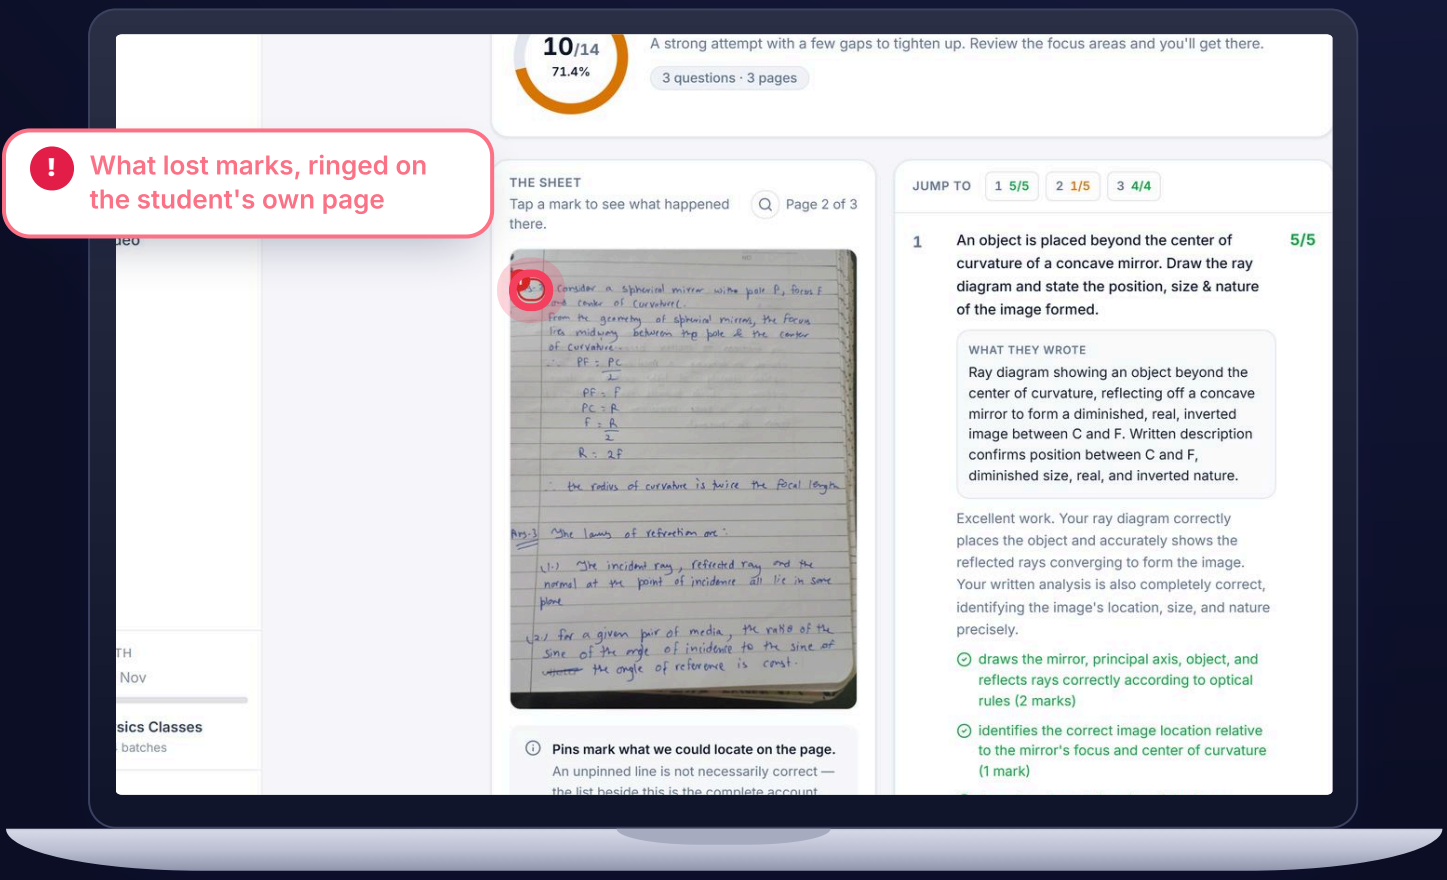
TUTOR GUIDE

Mark a whole batch in minutes. Every parent gets a report.

Set a CBSE paper, let your students write it on paper, photograph the pile. Murrics marks every answer, rings what lost marks on each student's own sheet, and sends each parent their child's report — signed with your name.



HOW IT WORKS

Your Sunday pile, marked for you

1. Set a paper
From the CBSE syllabus, or your own.

2. They write
On paper, in class or at home.

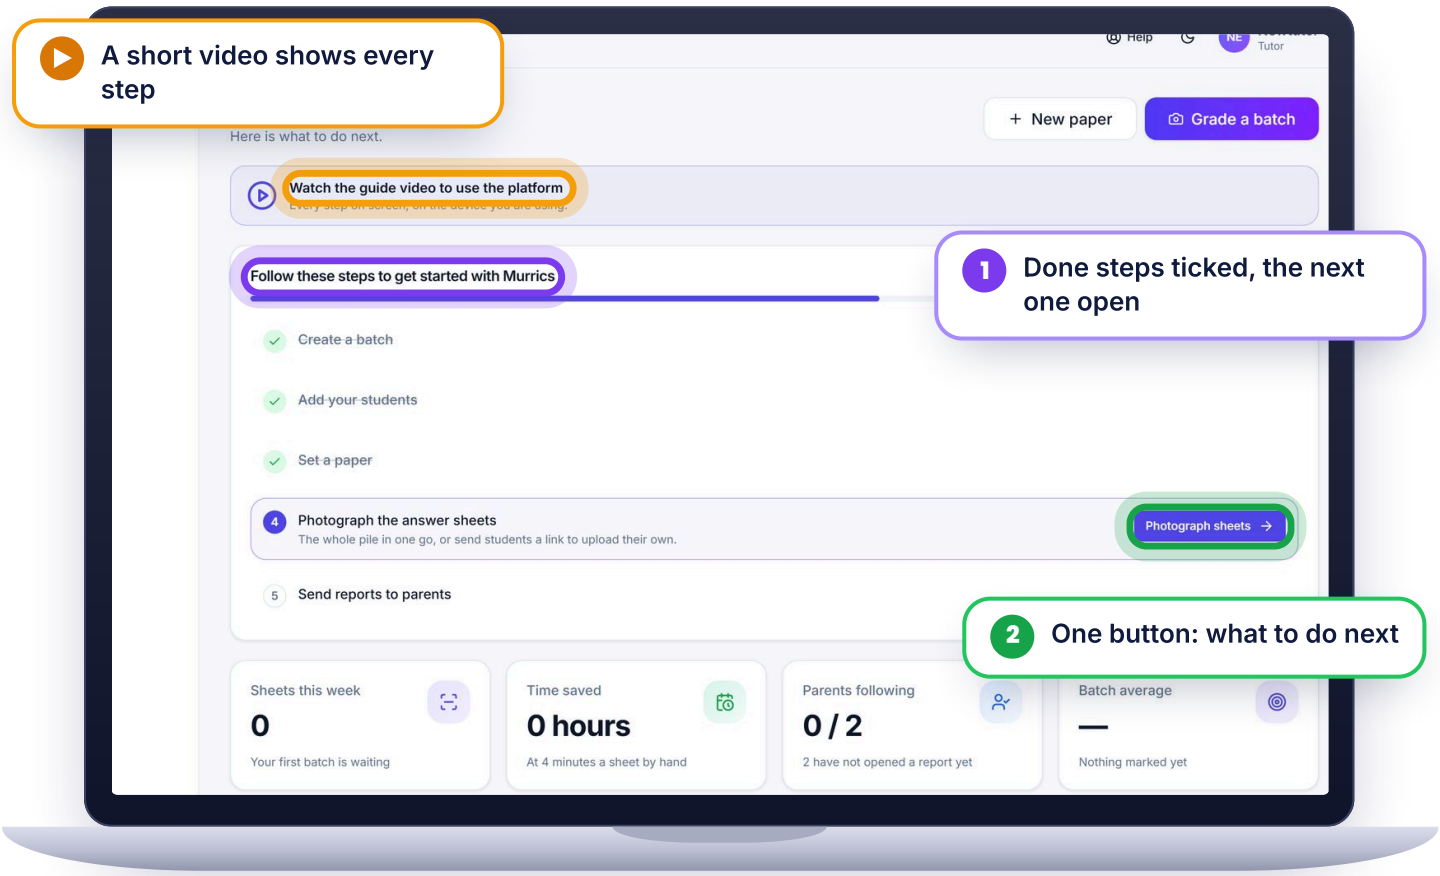
3. Photograph
The whole pile in one go.

4. Parents hear
Each gets their own child's report.

Start: sign in and follow the steps

1 **Open murrics.com and sign in with Google**
Choose “For tutors”. Confirm your WhatsApp number once — it is for your account only.

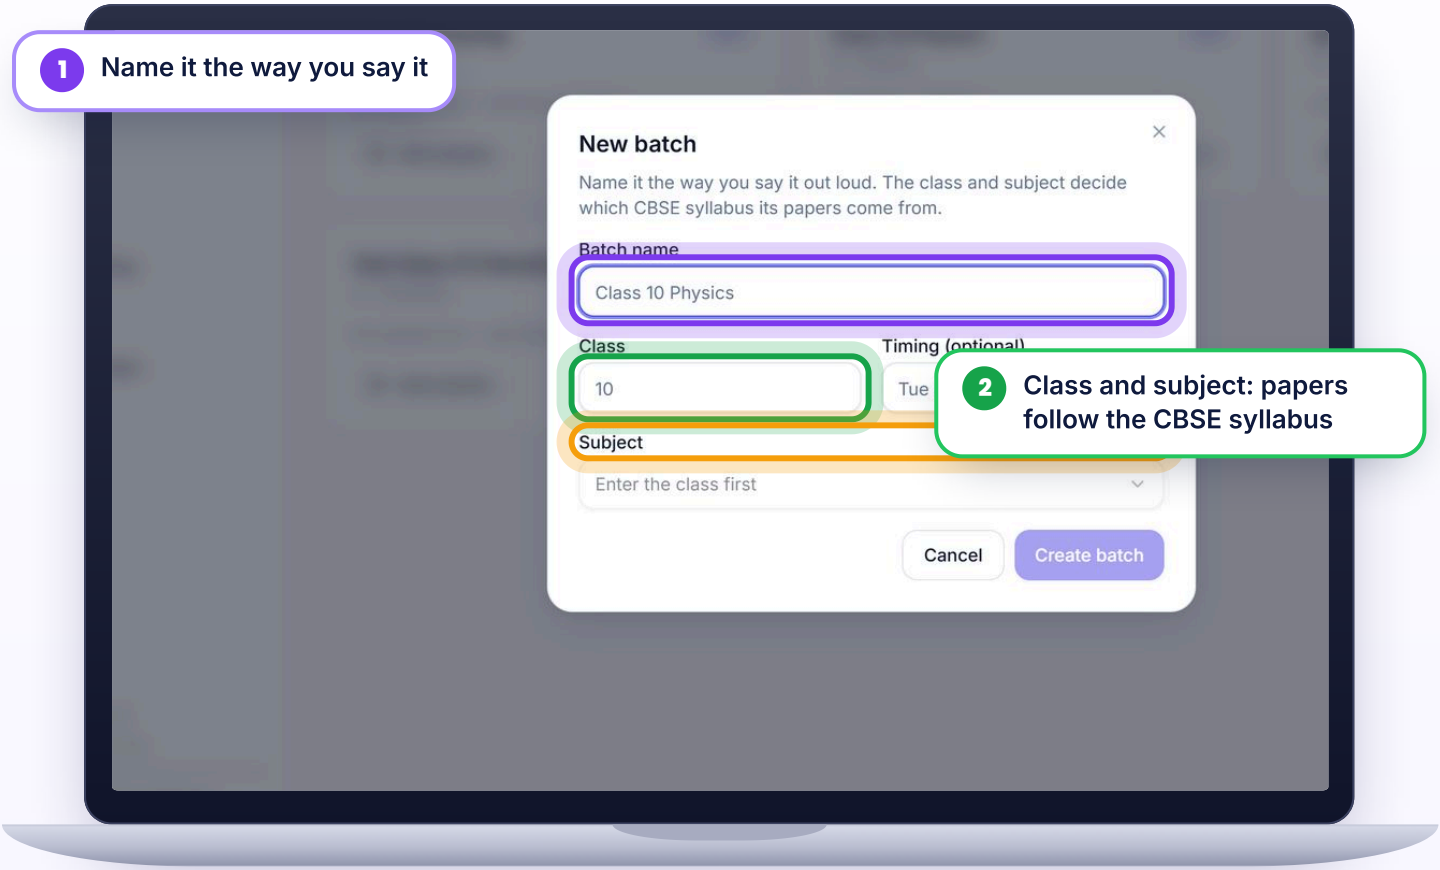
2 **Follow the steps on Today**
Five steps, the next one always has a button. A green tick appears as each is done — on every page.



STEP 1 & 2 · BATCHES AND STUDENTS

A batch is one group you teach

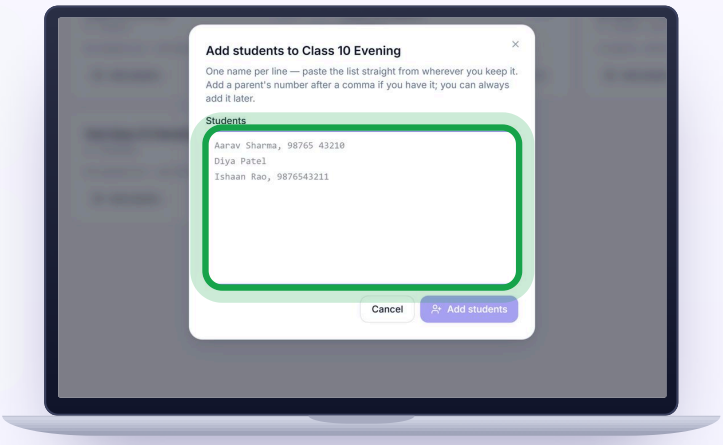
Create one for each group, for example “Class 10 Physics”. The class and subject decide which CBSE syllabus its papers come from.



Then add your students — by name

Paste the list, one name per line
Add a parent's mobile after a comma:
Aarav Sharma, 98765 43210

No logins, no emails
Students never need an account. A number is only needed to send a report home — add it any time.

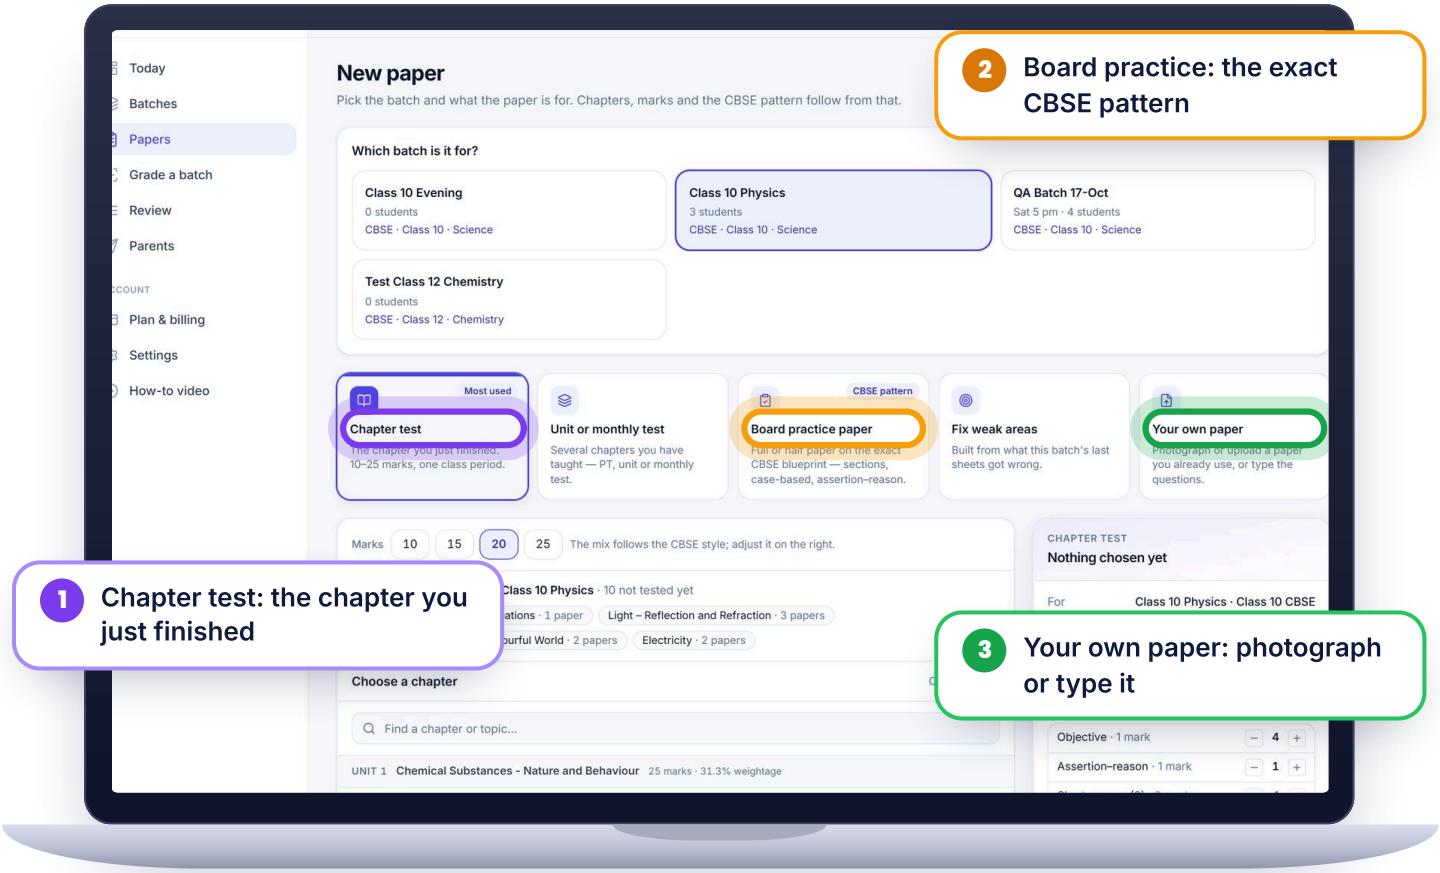


STEP 3 · SET A PAPER

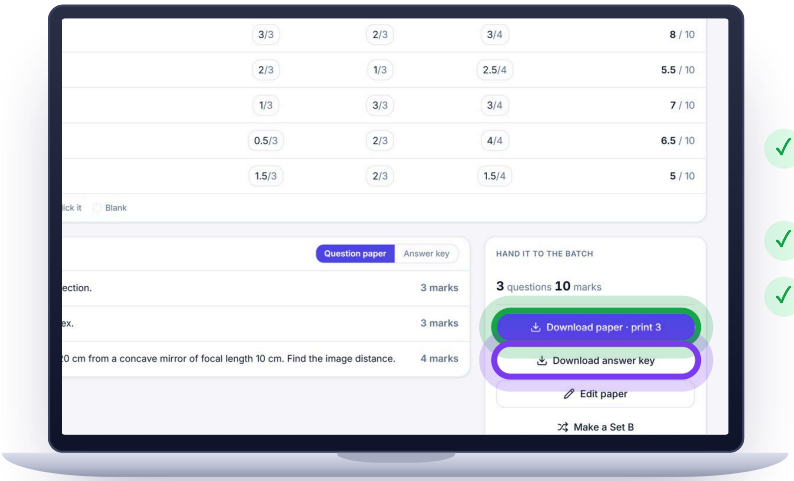
A CBSE paper with its answer key

😫 **The problem:** writing a fresh test and its marking scheme takes an evening, every week.

✨ **Murrics:** pick the batch and what the paper is for. Murrics writes it from the syllabus, with an answer key for every question. Or bring your own paper.



🖨️ **Print it:** open the paper and use **Download paper** for the students and **Download answer key** for you. Fix weak areas builds a retest on the topics your batch lost marks on.

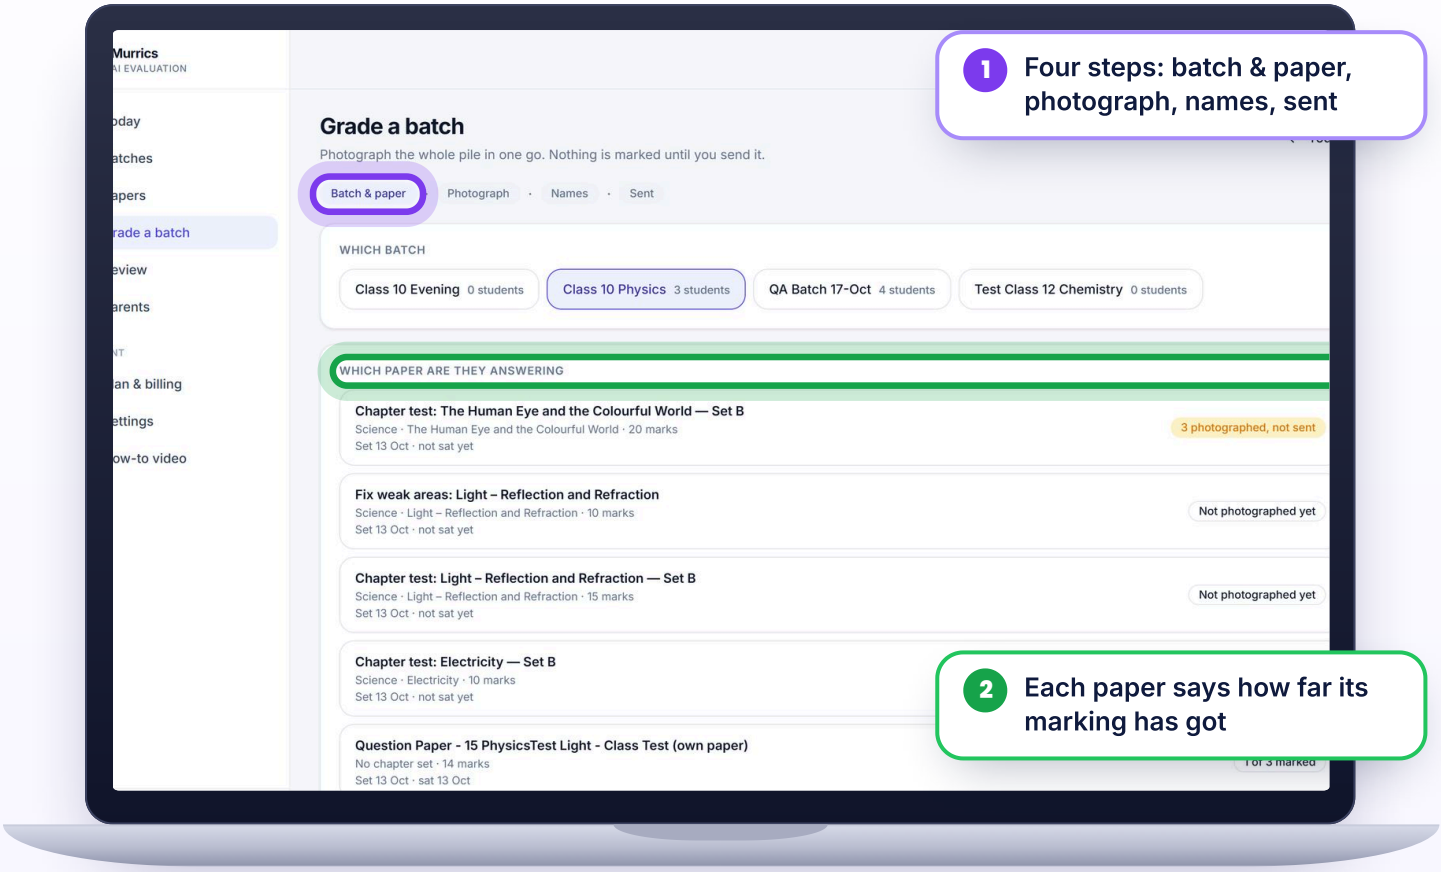


- ✓ Every question has an answer key with what earns each mark.
- ✓ Edit any question before you print.
- ✓ The paper's page also tracks how many sheets are photographed, marked and sent.

STEP 4 · PHOTOGRAPH THE SHEETS

The whole pile, in one go

Open **Grade a batch** on your phone or laptop. Pick the batch and the paper, photograph every page, then match the sheets to names. Nothing is marked until you press send.



Good light

Flat page, whole page in the frame. A blurry page is sent back for a retake, never guessed at.

Or a student link

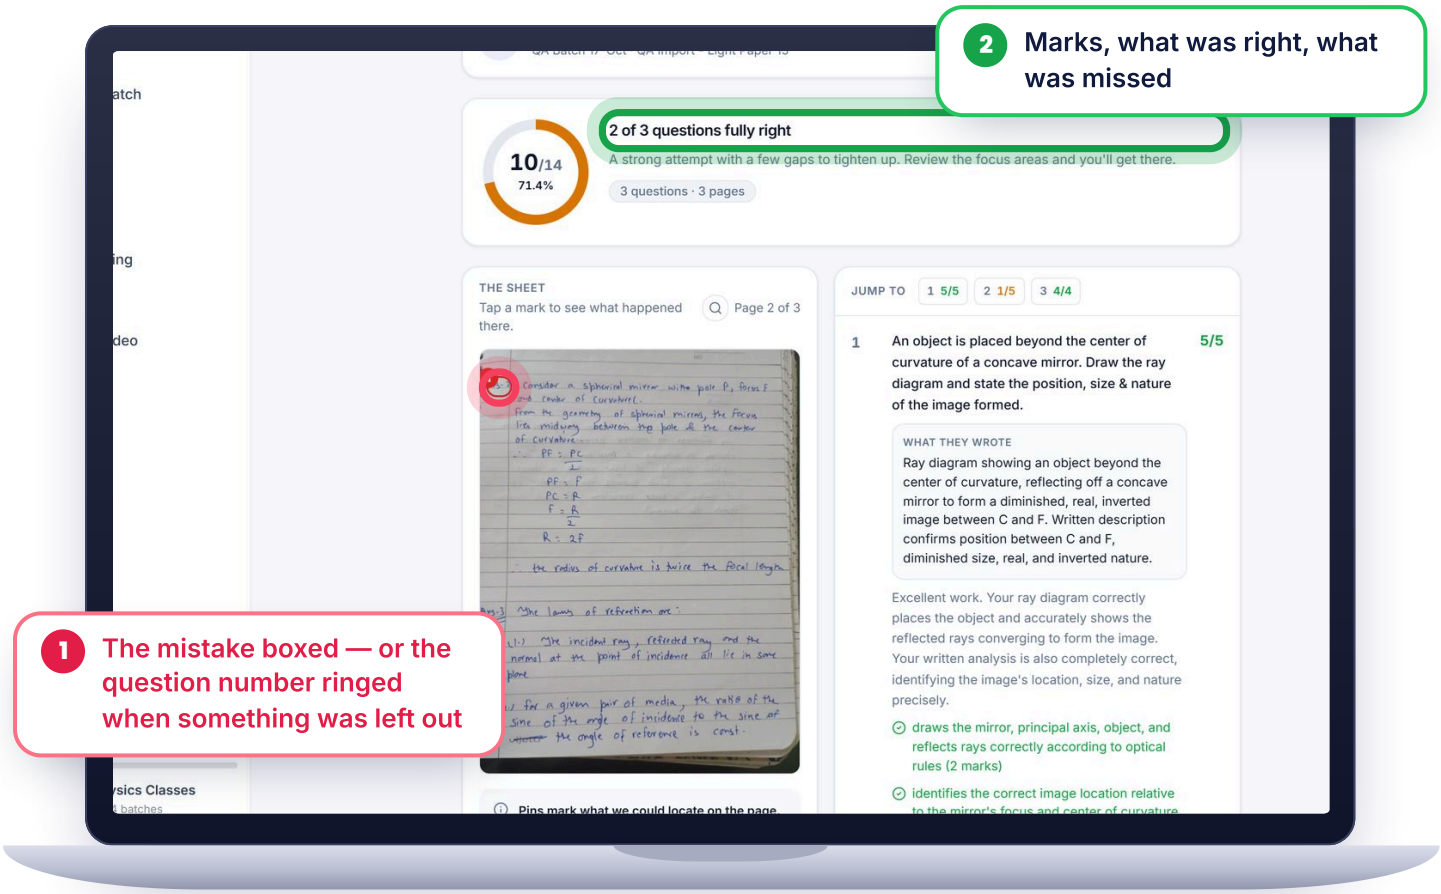
Students upload their own sheets from home with the link on the paper's page.

Minutes, not hours

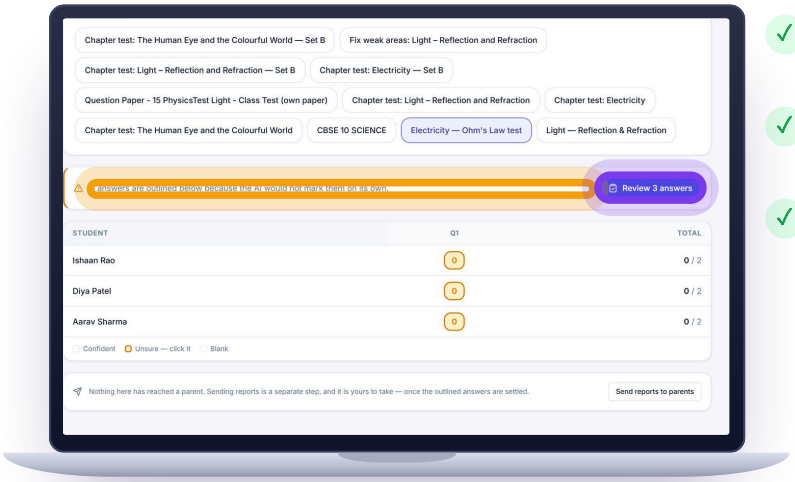
Marking runs in the background. Come back to Today when it is done.

THE MARKED SHEET

Every answer marked. You have the last word.



Review: answers the AI would not mark on its own

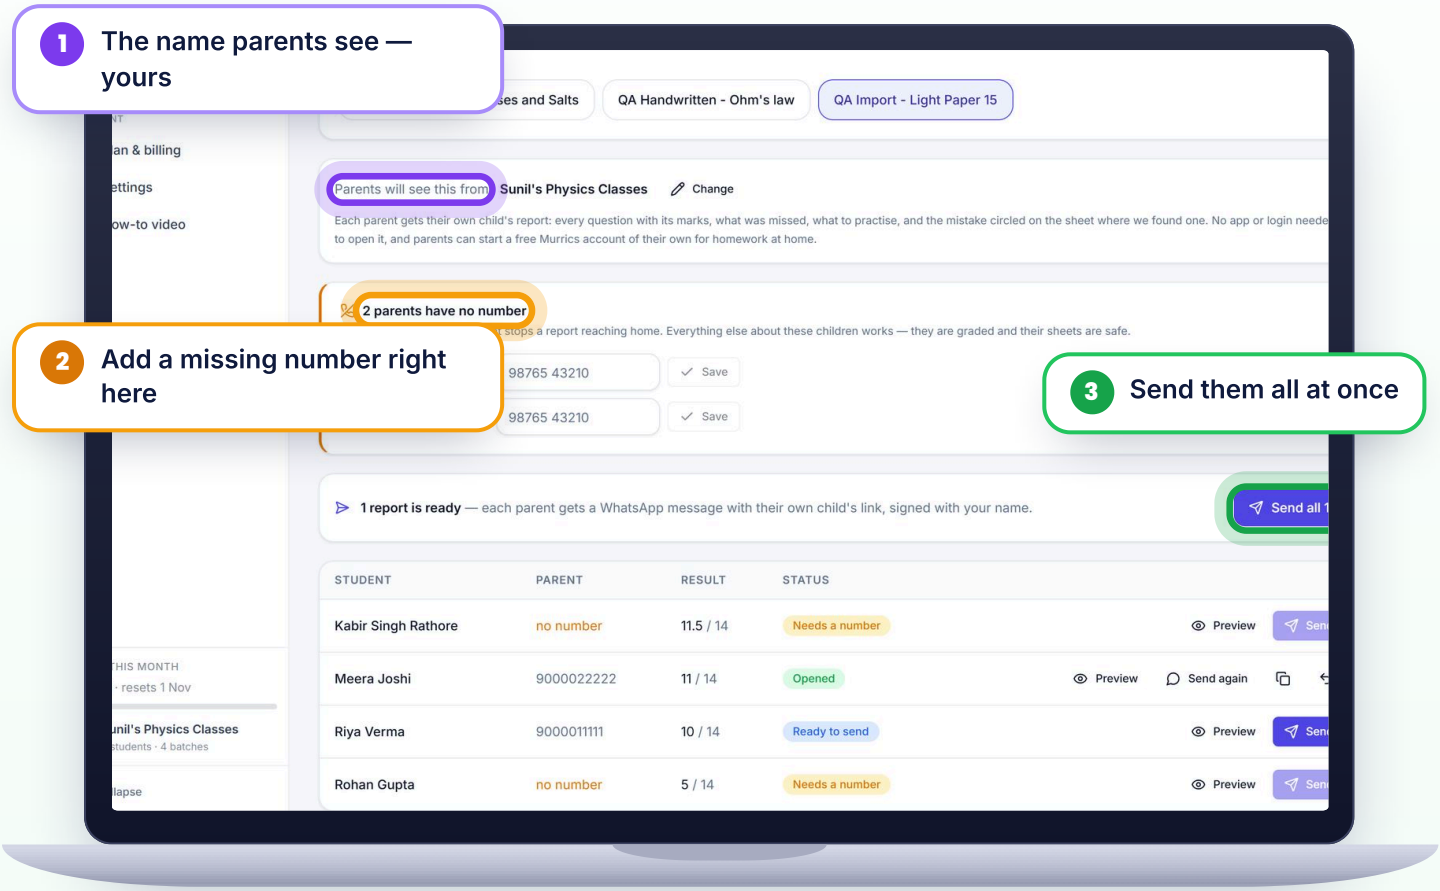


- ✓ Unsure answers are outlined — click one, see the student's writing, settle the mark.
- ✓ Change any mark on a sheet with one click; the report follows your mark.
- ✓ Nothing reaches a parent until the outlined answers are settled.

STEP 5 · SEND REPORTS TO PARENTS

Each parent gets their own child's report

One WhatsApp message each, with a link to their child's report: every question, what was missed and what to practise — signed with your name. No app and no login for parents.



See who opened it

Each child shows Sent or Opened, so you know which family to remind.

Private by design

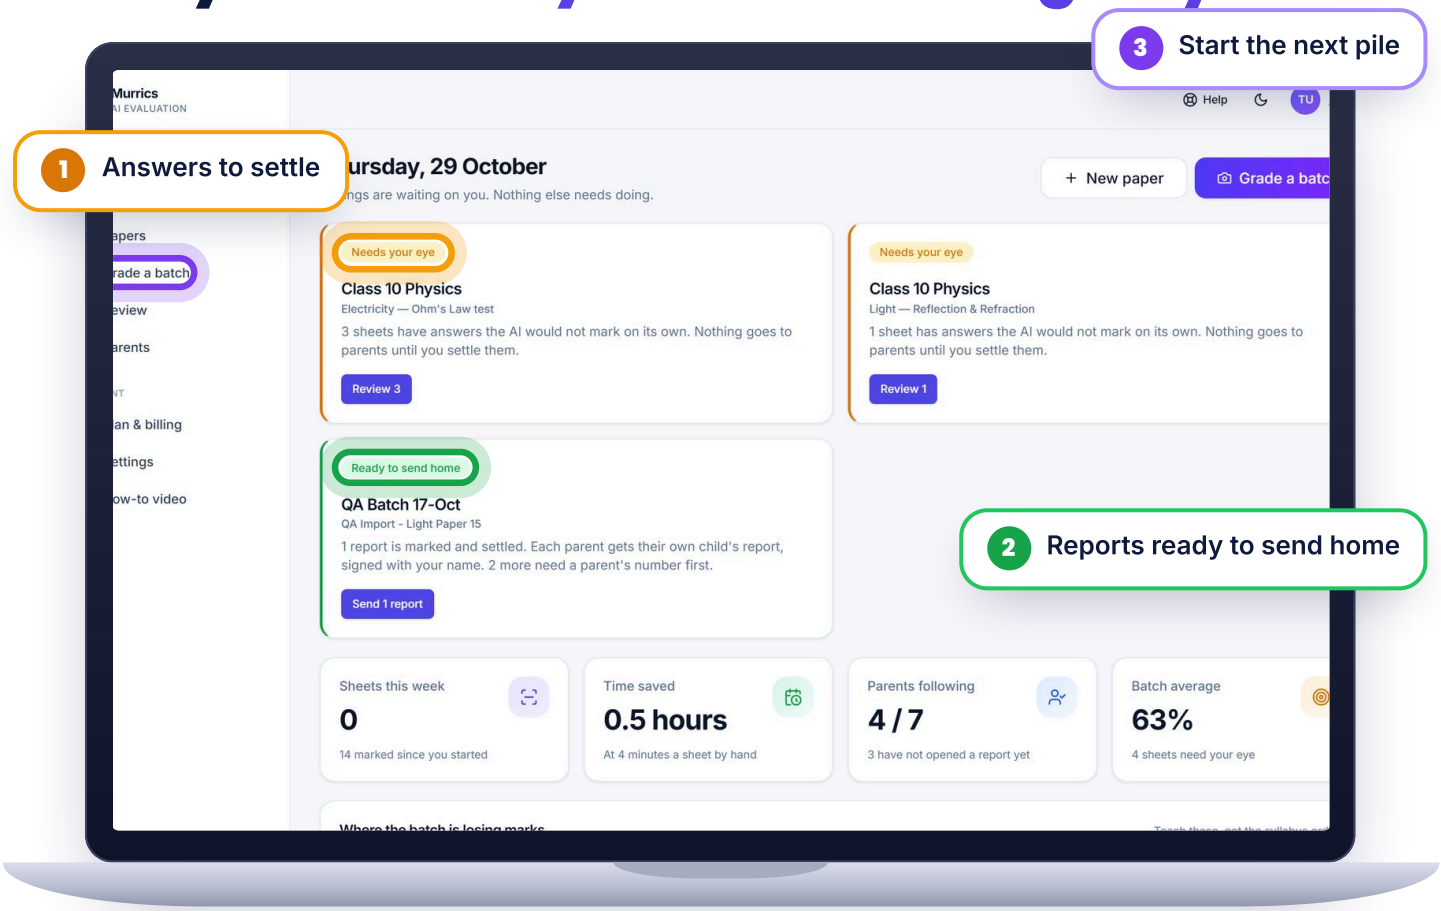
A parent sees only their own child — never the batch or another student.

Parents who see, stay

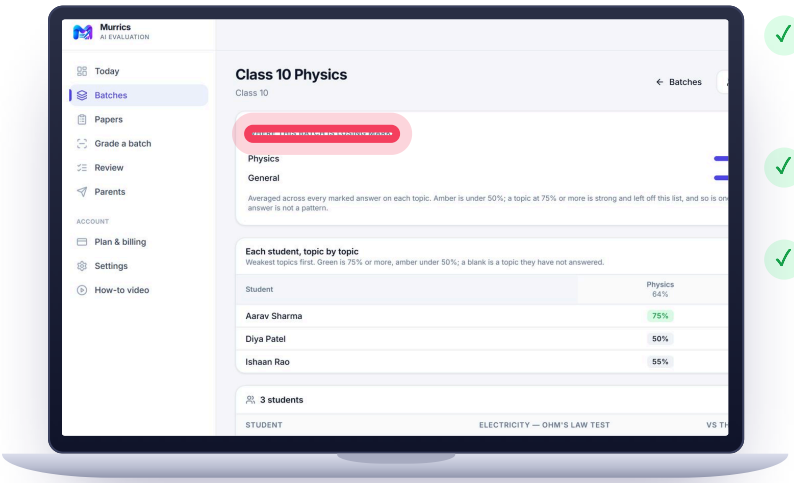
Families who follow the progress are the ones who renew.

EVERY WEEK AFTER

Today shows only what is waiting on you



Where the batch is losing marks



- ✓ Each batch lists the topics the room is losing marks on, and how many students are behind each.
- ✓ **Set a paper on these** builds a retest on exactly those topics.
- ✓ Open any student to see their own sheets and how they compare with their usual.

🔒 Your students' data stays yours

- ✓ Only you see your batches, sheets and results
- ✓ A parent sees only the report links you send them
- ✓ Your WhatsApp number is for your account only — never shown to parents
- ✓ We never sell data and never show ads

Start free

Every tutor starts on the free plan. Paid plans are priced by how many students you teach and counted in sheets marked each month. See **Plan & billing** in the app for today's prices.
